The reason CDWG was chosen over the lowest bidder is as stated. The lowest bidder submitted an alternate product other than what the Obion County Board of Education was seeking. Although this product is comparable to the listed product on the bid. The Obion County Board of Education past experience with Lenovo products has not been up to par with the standards that the Technology department is seeking. Further testing would be required to prove that the product that was proposed by the lowest bidder will work as well as the product listed on the product page of the bid. Any other question may be directed to Joseph Lewis or Shane Upchruch.
